Registered in England & Wales · Registered number: 6994094

February – April 2019

Building Work

Please be aware that throughout February to April 2019 there will be building work being carried out at Umberslade Farm Park. This work is located in one site and fenced off so no access can be gained from visitors. Large pieces of machinery will be on site and be in use during visits but this will only take place in the building site area.

All safety precautions have been put in place and the building work will not have an impact on your visit in any way.

Umberslade Farm Park specifically caters for educational visits. We aim to provide schools with a truly interactive farm park experience in safe and hygienic surroundings. Our fully trained guides ensure every visitor enjoys the maximum benefits during their tour of the children's farm park whilst undertaking the many activities on offer. We are here to assist your group to gain maximum learning and maximum enjoyment from their visit, and this is done through working in close partnership with you.

Health and safety is paramount at Umberslade Farm Park. To help teachers and group leaders prepare for a visit, we have done our own hazard risk assessments about our operation and the important points are listed below. However, there will be things that require your own judgment, relating to your knowledge of your own, specific group of children and adults. You are responsible for your group's behavior at all times and this includes times when you may meet other visitors to the Farm Park.

We advise a pre-visit to our farm, during which you can carry out your own risk assessment and become familiar with the site.

Please take the time, therefore, to read our assessments and add your own notes where appropriate.

We emphasise to every group the importance of thorough hand-washing when handling animals and provide several hand washings basins, all with warm water.

UMBERSLADE FARM PARK: RISK ASSESSMENT
